

You are encouraged to use a [virtual machine](http://econ145.isit.ucsb.edu/) for R (<http://econ145.isit.ucsb.edu/>).

To start, click “Sign in with Your UCSB NetID” and sign in with your NetID.

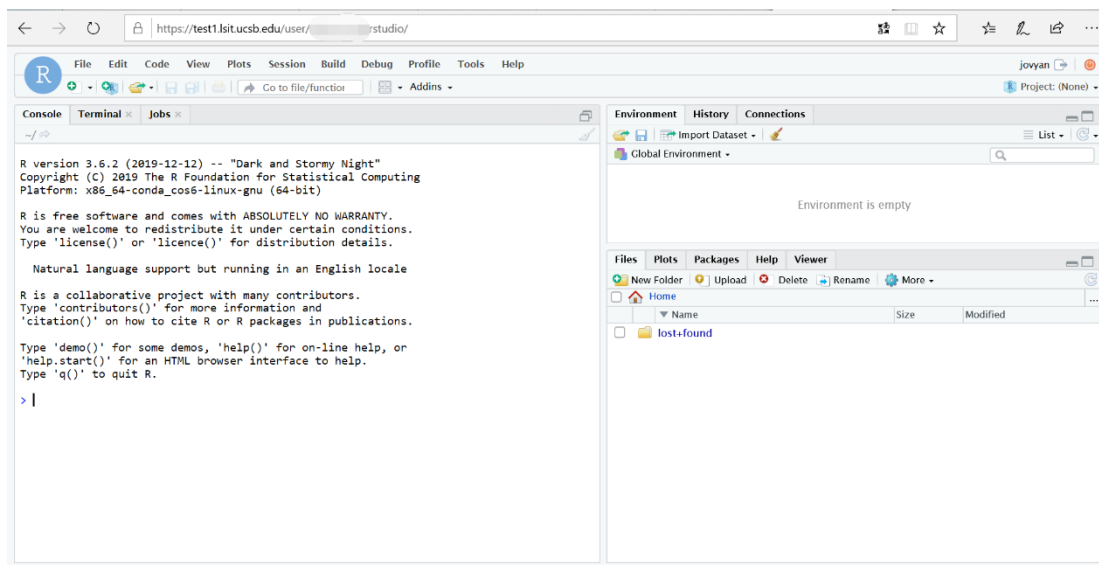

Sign in with Your UCSB NetID

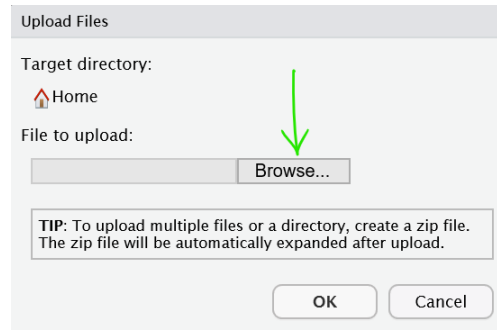

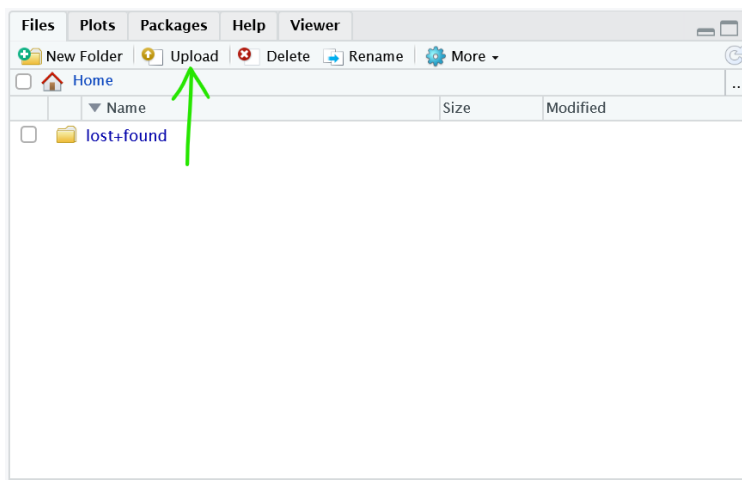

Then after clicking “Start My Server,” select the “Econ-145” server and click “Start.”

Now you are in the virtual RStudio window, and you can write and test your R code here as if you were doing it on a native machine.

Start

When importing datasets, you need to first put the dataset under the virtual working directory. To do so, click “Upload” in the Files pane and then in the popup window, “Browse...” for the file you would like to upload.

To download any saved files, go to the Files pane and check the boxes before those files. Click “More” and in the drop-down menu, choose “Export.” Then you can follow the instruction to save the files in the desired location on your computer.

After you are done with your work, you can sign out by clicking the “Sign Out” button at the top right corner of the Workspace pane.
